You play this as a first-person shooter (FPS) and you can join multiple game modes: Be the king of the hill in a free-for-all, or cooperate with teammates to win in a team deathmatch. Next to these game modes, you can also join custom game modes. Choose between different classes, for example, agent, runner, hunter, and more. Every class comes with different appearances and weapons. Weapons can range from assault rifles to snipers, shotguns, pistols, and even rocket launchers! In Krunker.io you can play default maps, but also maps created by the community. Krunker.io is fast-paced and has a similar feeling to Counter-Strike. Keep track of your K/D ratio, wins, scores and show how competitive you are. Challenge your friends here on Poki to beat your scores. Melee Every class carries a melee weapon, the combat knife. Attachments and Reticles Not every weapon has the ability to add an attachment. By leveling up you can unlock different attachments. The first attachments you unlock are the Reflex Sight and the Acog Sight. There are 10+ different reticles to choose for your sights. There is even the ability to upload an image to use as your reticle. You can also customize the reticles themselves by adjusting the Reticle Image Height or Width.
